Economy growth prospects of the region are connected with modernization of production facilities, introduction of innovative technologies, and, clearly, growth of investments in fixed assets.

We are striving to make the area more attractive for external investments, and today we can say with certainty that there are favorable trends in this area.

Bryansk Region represents interest to investors. This is the result of honest and stable partnership with business community and government structures.

N.V. DENIN
Governor of Bryansk Region

GENERAL INFORMATION

Bryansk Region is an area with a rich historical past and its own way of development. This is a region, which for centuries has been the ground for numerous intercultural contacts.

In X-XIII centuries the area now known as Bryanschina was the part of Kiev Rus, and when it was divided into fiefs, upper reaches of Desna river and its tributaries were included into Chernigov lands, and the northernmost areas became the part of Smolensk lands. In the second half of the XII century cities were founded on the northern edge of Chernigov region, which for centuries has been the ground for numerous intercultural contacts.

In X-XIII centuries the territory now known as Bryanschina was part of the Kiev Principality. In the second half of the XII century, the land was divided into Smolensk and Orel Regions.

After the destruction of Vshchizh in 1238 by the Tatar Mongols, the importance of Bryansk began to increase (first record is dated by 1146, although, based on archaeological data and indirect evidences of the city, it is considered to be was founded in 980-s.). Bryansk principality arose, which at the end of XIV - XVI centuries was included in the land of the Lithuanian-Russian Grand Duchy.

Consolidation of the Russian lands around Moscow in the XVI century resulted in Bryansk Region joining the Moscow state.

Then, up to the 1917 revolution, administrative affiliation of modern Bryanschina lands in the Russian state was different.

The northeast - Bryansk, Trubchevsky, Sevsk, Karachev lands (generally they can be called as Verkhnee Podesenye) - were Russian districts administrated on general grounds from Moscow. At the end of the XVIII century they became the western part of Orel governorate (Bryansky, Trubchevsky, Sevsky, most part of Karachevsky counties).

South-west - the land around Starodub and Mglin were included into the territory subordinated to hetmans of Levoberezhnaya Ukraine, since 1663, as a part of Starodubsky Regiment (Starodubje). When the Russian Empire was divided into governorates, these lands successively belonged to the Kiev province, Little Russia governorate, Novgorod-Seversky governorship and, finally, Chernigov governorate (making its northern part or Zadesenye - Starodubsky, Mglinsky, Surazhsky and nearly all-Novozybkovsky counties).

In 1920, five counties: Bryansksky, Karachevsky, Sevsky, Trubchevsky, as well as Orel governorate and Zhizdrinsky county of Kaluga governorate were merged into the Bryansk governorate.

In 1929 the Bryansk governorate was abolished and became a part of the Western Region with the center in Smolensk city. In 1937, according to the order of CEC of USSR, the Western Region area was divided into Smolensk and Orel Regions.

On July 5, 1944 by the Decree of the Presidium of the Supreme Soviet of the USSR, independent Bryansk Region was separated from the Orel Region, comprising 28 districts: Brasovsky, Bryansky, Vygonichsky, Gordeevsky, Dubrovsky, Dyatkovsky, Zhiriatinsky, Zhukovsky, Zlynkovsky, Karachevsky, Kletynansky, Klimovsky, Klintsovsky, Komarichsky, Krasnogorsky, Mglinsky, Navlinsky, Novozybkovsky, Pogarsky, Pochepeusky, Rognedinsky, Sevsky, Starodubsky, Suzemsky, Surazhsky, Trubchevsky, Unechsky and Ponurovsky (abolished in 1957).

Bryansk Region has temperate continental climate, with warm summers and moderately cold winters. The average annual temperature ranges from 4.5°C in the northern districts (Rognedino) to +5.9°C in the southern districts (Sevsk). The warmest month is July (18-19°), while the coldest is January (-7.2-9.0°C).

Duration of the period with an average temperature above 0°C is 217-234 days. According to long-term data, freezing in the region ceases in early May and resumes in late September - early October. Frost-free period lasts 130-135 days. In hollows and valleys the frost-free period is 15-30 days shorter that on slopes.

The region is classified as moderate-mild winter and warm summer zone according to its temperature regime. The difference in average annual temperature between individual years is usually insignificant.

The region is a zone of moderate humidity in term of rainfall. The average annual rainfall is 550 to 600 mm; the largest rainfall is in the north - in Dyatkovo and Bryansky districts - in July (80-100 mm) and the smallest rainfall is within a narrow band: Pochepe-Klimov - Novozybkov in December, January, February (25-35 mm per month).

The average snow cover lasts 100-120 days, it is particularly strong in the last week of February. Cover thickness in the fields reaches 10-25 cm, and up to 40 cm forest up. By the end of the spring thaw up to 200-250 mm of moisture is accumulated in soil. This quantity is enough to moisten the soil in the summer months.

The wind regime of the region in the warm season (April-September) is characterized by a predominance of north-western, north-eastern and western winds, and in the cold season (October - March) - south-western, south and western winds.

Approximately 95-97% of the time there is a weak and moderate wind. Strong winds of 15 m/s are observed for 10-18 days (3-5% of the time).

Due to relatively small area of the territory with a total flat surface, there’re no significant differences between the macro-characteristics of its individual parts.
According to the schematic climate zone map of Russia, in terms of construction Bryansk Region refers to the area - II, subarea - II B, that is climatic conditions of the region are favorable for human life, work, leisure and tourism and cause no restrictions on capital construction.

GEOGRAPHICAL LOCATION AND ADMINISTRATIVE DIVISION OF BRYANSK REGION

Bryansk Region has favorable transport and geographic location. It is located at the intersection of major highways (Moscow - Kiev, St. Petersburg - Kharkov - Rostov, Orel - Vitebsk) at the west of the European part of the country.

Area of the region is 34.9 thousand sq. km.

The region is a part of the Central Federal District, bordering two countries and four regions of the Russian Federation: in the west it borders with the Republic of Belarus (Gomel and Mogilev Regions), in the south - with Ukraine (Chernihiv and Sumy Region) in the north - with Kaluga and Smolensk Regions, and in the east - with Orel and Kursk Regions of Russia.

The region is crossed by five major rail lines with access to Poland, Germany, Slovakia, Hungary, Romania, Bulgaria, the Baltic States and CIS.

Bryansk Region includes 289 municipalities: 27 municipal districts, 6 urban districts, 30 urban and 226 rural settlements.

The administrative center of Bryansk Region is Bryansk city.

Several districts of Bryansk Region are border zones. Border zones of Bryansk Region, adjacent to the state border of the Russian Federation and Ukraine, are set within the following limits:
- in the municipality "Klimovsky district" - the territory of rural settlements Novoyurkovichskoye, Khoromenskoye, Kirillovskoye, Kamenskokhutorskoye, Novoropskoye, Brakhlovskoye;
- in the municipality "Starodubsky district" - the territory of rural settlements Voronokskoye, Ponurovskoye;
- in the municipality "Pogarsky district" - the territory of rural settlements Kisterskoye, Gorodischenskoye, Chausovskoye, Vitemlyanskoye;
- in the municipality "Trubchevsky district" - the territory of urban settlements Beloberezkovskoye, rural settlement Teletskoye;
- in the municipality "Suzemsky district" - the territory of rural settlements Novopogoschenskoye, Aleshkovichskoye, urban settlement Suzemskoye excluding township Suzemka;
- in the municipality "Sevsky district" - the territory of rural settlements Podlesnonovoselskoye, Kositskoye, Troebornovskoye.

Rules of entry (passage), temporary stay, movement of persons and vehicles in border areas are defined by the Rules of the border regime, developed with the purpose to implement Article 16 of the Russian Federation Law No. 4730-1 "On the State Border of the Russian Federation" dated April 1, 1993.

STATE POWER BODIES OF BRYANSK REGION

State power bodies system of Bryansk Region is composed of:
- the senior official of Bryansk Region, Governor of Bryansk Region;
- the legislative (representative) state power body of Bryansk Region, Bryansk Regional Duma;
- the highest executive state power body of Bryansk Region, Government of Bryansk Region;
- bodies of executive power of Bryansk Region;
- magistrates of Bryansk Region.

The Government of Bryansk Region consists of the Governor of Bryansk Region, Vice-Governor of Bryansk Region, deputy governors of Bryansk Region, directors of departments of Bryansk Region, heads of boards of Bryansk Region, chairmen of committees of Bryansk Region, chiefs of inspections of Bryansk Region.

The Governor of Bryansk Region is the chairman of the Government of Bryansk Region.

Bryansk Regional Duma consists of 60 deputies. Work of the Duma, its bodies and staff is organized by the chairman of the Duma, his deputies, and other officers of the Duma, elected from among its members. The term of office of a single convocation of Bryansk Regional Duma is 5 years.

State power in Bryansk Region is exercised by bodies of state power of Bryansk Region, as well as federal executive authorities and federal courts.

TERRITORIAL PLAN OF BRYANSK REGION

Scientific and Design Institute of Spatial Planning ENCO has developed a spatial planning scheme of Bryansk Region.

In order to increase economic activity and investment attractiveness of the region, five major and four interregional economic activity zones were identified.

Area of economic activity
1. Bryansk multifunctional industrial and logistics zone of economic activity. Growth pole - Bryansk, Dyatkovo, Fokino. The zone accumulates major industrial, scientific and educational potential of the region, with diversified economic complex formed in it. Key areas of economic specialization include engineering, defense industry, production of construction materials, woodworking. A promising area of specialization is the development of transport and logistics activities. Advanced development zone is created within the area with a focus on transport and logistics activities and industrial complex.

2. Karachev industrial and recreation zone of economic activity. Growth pole - Karachev. The economic potential is based on diversified industrial complex (engineering, defense industry complex, light and wood industry); besides tourist and recreational complex will be developed in future.

3. Pochepep industrial zone of economic activity. Growth pole - Pochepe. Currently, the industrial potential of the city is low. The production of construction materials, food and processing industries are to be developed in the future.

4. Unecha industrial zone of economic activity. Growth pole - Unecha. Key areas of economic
specialization include engineering, defense industry complex, light industry and woodworking. In the future, oil refining, and production of construction materials will be developed.  
5. Trubchevsk agroindustrial zone of economic activity. Growth pole - Trubchevsk. The priority for investment in this area is the development of agro-industrial complex.  
Interregional economic activity zones:  
1. Dyatkovo-Kirov-Lyudinov industrial zone. The main area specialization is the development of cooperation relationships between engineering enterprises.  
2. Karachev tourist and recreation zone (comprising territories of three Russian regions: Bryansk, Orel, and Kaluga Regions).  
3. Novozybkov-Gomel International zone. Development of cooperation between enterprises of the two countries, the establishment of new joint ventures. Within the area a zone of advanced development is formed with a focus on the production of construction materials.  
4. South agro-industrial zone. Combines large agro-industrial centers: Komarichy, Sevsk and Suzemka. Development of the area as a complex economic activity area is possible, subject to implementation of transport infrastructure development projects. The main economic specialization remains agricultural production and food processing.  

**Agro-economic zones of the territory**  
Four zones are identified in the region, according to the nature of agricultural specialization:  
1. Northern zone (Rognedinsky, Kletnyansky and Dubrovsky districts). Specialization - beef and dairy cattle and poultry breeding, potatoes and flax cultivation. The development of flux processing and processing of milk is planned.  
2. Central (suburban) area (Bryansk, Vygonichsky, Dyatkovo, Zhukovsky, Navlinsky Pochebpsky, Karachevsky, Zhiryatinsky districts). Presence of industrial cities - Bryansk, Zhukovka, Dyatkov, Karachev - predetermines the development of this zone as a suburban zone with intensive agricultural production development. Specialization - intensive cattle breeding, grain, potatoes and vegetable crop growing with developed poultry and pig breeding industries.  
3. South East zone (Brasovsky, Komarichsky, Sevsky, Suzemsky, Trubchevsky, Pogarsky, Staradubsky districts). Specialization - cattle breeding, grain, vegetable and potatoes crop growing with developed pig breeding industry. Lands in this area differ by heterogeneity of soil, so the agricultural specialization of the zone is different in the east and the south. If in the eastern part of significant areas shall be disposed for sugar beet, in the southern part the land is used for cereal crops, potatoes, flax, and canola.  
4. Western zone (Gordeevsky, Zlynkovsky, Klimovsky, Novozybkovsky, Klintsovsky, Krasnogorsky, Surazhsky, Unechsky, Mglinsky districts). Specialization - cattle breeding, grain and potato crop - growing, hop cultivation is advisable.  

**Recreational zones**  
Tourist and recreation structure of the region includes 4 tourism and recreational areas (destinations), formed by including the following municipal districts: Bryansky, Trubchevsky, Starodubsky and Novozybkovsky.  
The main centers of tourist appeal of Bryansk Region are traditionally represented by historic cities and their suburbs Bryansk, Trubchevsk, Starodub, Novozybkov, Sevsk, Karachev, as well as preserved manor ensembles and reserve museums in Krasny Rog village (A.K Tolstoy Museum), history and literature museum and nature sanctuary in Ovstug village (F.I. Tyutchev Museum), village Lyalichi. The region includes interesting and well-known outside the area archaeological monuments: ancient settlement Vshchizh, historical and archaeological museum "Paleolith", Poluzhye ancient settlement in in Yudinovo village. Cultural and educational tourism associated with visits to shrines (Svensky monastery), as well as monuments of the Great Patriotic War (Guerrilla Glade, "Hatsun" Memorial Site) gains increasing popular.  
Bryansk Region has attractive therapeutic recreational resources, represented by seven different mineral water basins and healing muds. Resort & health centers are Beloberezhskaya Heath (Bryansk Region), Zhukovka town and its suburbs, Klintsy town and its suburbs etc.  

**BRYANSK REGION DEVELOPMENT STRATEGY**  
The Strategy of Socio-Economic Development of Bryansk Region to 2025 has been approved by the Order No. 604 of the Administration of Bryansk Region on June 20, 2008.  
This Strategy identifies the major strategic objective of long-term development of Bryansk Region to 2025 as improving living standards of the population to a level above the Russian average index, and the further creation of favorable living conditions.
The potential of these enterprises allows to develop and master manufacturing of new high-tech products: medical equipment, railway equipment, grow monocrystals, produce semiconductors, cathode-ray tubes, fittings and assemblies for the aerospace and automotive industry, instrumentation equipment.

Machinery and equipment manufacturing is also one of the development priorities of Bryansk Region industrial complex. The main specialization is the production of various equipment for transport sector. Further development and diversification of engineering (primarily through investment mechanical engineering) will provide the basis for a highly developed industrial complex of Bryansk Region.

Woodworking is one of the fastest growing activities of the domestic economy. Active development of timber processing is planned, employing existing vast forest resources of Bryansk Region, including production of furniture, wood construction materials, joinery production.

According to the Strategy of Socio-Economic Development of Bryansk Region, industrial districts in municipalities are to be created by 2025, and their functioning supported, through the use of developed land with area of 50 to 200 hectares, to accommodate large and mid-sized enterprises, and facilities supplementary to the core activities of these enterprises.
RAW MATERIALS AND RESOURCE POTENTIAL OF BRYANSK REGION
MINERAL RESOURCES OF BRYANSK REGION

Mineral map legend:

- sand
- clay
- tripoli earth
- chalk
- phosphate-containing ores
- carbonate raw materials
- peat
- loam
- mineral water
- quartz sand
- limestone
- ferruginous quartzites
- glass sand
- phosphorites
- marl
- gravel
- iron ore
- dolomite
- titanium - zirconium ores
- red clay
MINERAL & RESOURCE BASE

Mineral resources of the region are represented by 21 minerals: 13 types of minerals of the 19 recorded in the State balance are being mined. More than two thousand deposits and sectors of minerals are explored, 913 are listed on the balance of Bryansk Region.

Bryansk Region is one of the leaders in the Central Federal District (CFD) by number of explored reserves of several minerals.

The reserves of phosphate rock represent 29% of the reserves of Russia, glass sand - 9.4%; expanded clay reserves represent 6.3%, tripoli - 7.1%, construction sand - 4.7% of the reserves of CFD.

All known mineral deposits in Bryansk Region can be divided by their importance into three groups by resource types:

2. Mineral resources of regional significance, cement raw materials, refractory clay, molding sand, chalk for the glass industry, tripoli, peat, sapropel, organo-mineral deposits, underground mineral water and large intakes of fresh groundwater.

3. Mineral resources of local significance, construction materials (brick & tile and expanded clay raw materials, construction sand, sand-gravel aggregate, chalk for construction), carbonate rocks for liming acid soils.

Mineral resources sector of the region is more developed in the north-eastern part, in Bryansk and Dyatkovsky districts, where the major mineral mining and processing facilities are located.

Based on the current degree of geological and geo-economic study, the most interesting objects for subsoil use and attracting investment in organization of exploration and mining are:

- titanium-zirconium phosphate sands (Unehskoye deposit);
- glass and titanium-zirconium sands (Novozybkovskoye deposit);
- molding sand (Svenskoye deposit);
- refractory clay deposits ("Siny Kolodez");
- Construction sands (Navlinskoye deposit).

The use of Unehskoye deposit potential allows for comprehensive utilization of mineral resources for the production of building materials, metal concentrates for the industry, chemical fertilizers necessary to restore and improve the quality of agricultural land soil.

Total explored reserves of phosphate rock in 17 deposits of the region are about 462 million tons. Novozybkovskoye deposit is included in the state reserve. Significant part of glass sands of this deposit is located within city limits and is not developed due to building development. Integrated titanium-zirconium placers and glass and moulding sand deposit are represented here. Glass sand reserves of industry categories (A + B + C1) are 29.36 million tons.

Novozybkovskoye deposit can be the basis for launching the project of construction of mining and processing plant for the production of building materials, metal concentrates for the industry.

Quaternary clay resources of Dunaevskoye deposit in Karachevsky district can be developed and used for the production of ceramic bricks through plastic molding method with the use of vacuum degassing. The total volume of deposits in C1 + C2 categories is 8.4 million cubic meters, of which C1 - 3.1 million cubic meters, C2 - 5.3 million cubic meters.

LAND RESOURCES

Region's land area is 3485.7 thousand hectares as of January 1, 2012. Among all categories of land, agricultural land dominates in the territory (1979.3 thousand hectares), forest land has a significant share as well (1208.9 thousand hectares). Settlement land area is 192.4 thousand hectares. The land for industry, energy, communications needs and other special purpose land accounts for only 37.2 thousand hectares of land, protected areas occupy 12.7 thousand hectares, water fund land area is 5.1 thousand hectares. Significant part of the land in the region belongs to reserve lands - 50.1 thousand ha.
Agricultural land dominates in the structure of land area. The largest share of farmland is concentrated in the category of agricultural land - 1720.5 thousand ha (91.7%). Main agricultural land users are agricultural enterprises, organizations, institutions and individuals engaged in agricultural production.

Building area within agricultural land amounts to 23.5 thousand hectares and is used for manufacturing centers, vehicle fleet, warehouses, etc.

As of 01.01.2012, 1297 thousand hectares are owned by citizens, 126.4 thousand hectares are owned by legal entities and 2062.3 thousand hectares are in state and municipal ownership, where title to land for 1274 thousand hectares is registered for the Russian Federation, 9.6 thousand hectares are the property of Bryansk Region and 3.2 thousand hectares are in municipal ownership.

WATER RESOURCES

Bryansk Region belongs to the basin of the Black and Azov seas (Dnepr river basin). Fresh water reserves (including groundwater) amount to 4510 million cubic meters. Around 3.2-3.6% of renewable water resources from surface and groundwater sources are used annually for drinking and household needs of the population and industries, i.e. the need of fresh water is met in full.

Surface water areas are formed mainly in the catchment areas of the rivers Desna, Snov, Ipit, Besed.

Desna, the largest river of the region, with its major tributaries Bolva, Sudost and Nerussa gives 63% of the annual runoff of the region. Cities of Bryansk, Zhukovka Trubchevsk are located on Desna river banks. Desna floodplain width varies from 4 to 6 km, and river channel is 50-200 m wide. Desna river is the longest left-bank tributary of Dnepr, and the second largest in terms of catchment area.

The region has 766 ponds, 29 reservoirs, 21 natural lakes. The total amount of water accumulated in the ponds is 74.5 million cubic meters, in reservoirs - 58.7 million cubic meters, in lakes - 20.7 million cubic meters. The total area of ponds and reservoirs is 7.8 thousand hectares, lakes - 472.6 hectares.

Within the Desna river catchment area, the largest water supply is in Rognedinsky, Vygonichsky, Suzemsky, Pochepsky districts; in Ipit river basin - Kletnyansky, Mglinsky districts; in Besed river basin - Gordeevsky district.

Bryansksky, Dyatkovsky, Komarichsky, Trubchevsky, Pogarsky, Klintsovsky, Novozybkovsky and Zlynkovsky districts are experiencing a certain lack of water resources.

Total forecast useful groundwater resources are about 5 million cubic meters / day.

There are seven mineral water basins in Bryansk Region. Predicted resources of different types of mineral water in the whole area are estimated as 16.91 thousand cubic meters / day, proven useful resources are 1.27 cubic meters / day.
FOREST RESOURCES

Bryansk Region is a zone of mixed coniferous and deciduous woodland.

The area of forest land in Bryansk Region is 1236.3 thousand hectares, including forest area located on the forest fund lands of 1208.9 thousand hectares. The total stock of plantations is 225.8 million cubic meters.

Wooded area varies in different municipalities and ranges from 11.6% (Komarichsky district) to 65.8% (Dyatkovsky district). Most wooded districts of the region are Dyatkovsky, Navlinsky, Kletnyansky, Suzemsky. Sparsely wooded districts of Bryansk Region are Komarichsky, Pogarsky, Zhiryatinsky, Starodubsky, Surazhsky districts.

Significant portion of the forest - 54% of the total area - is classified as protective. Merchantable forest area in forestries is 509 thousand ha or 45% of the total forested land of the forest fund; the share of coniferous forests is 48%, hardwood - 6%, softwood - 46%. The total timber resources in merchantable forests of Bryansk Region Forest Management Office forestries amount to 99.4 million cubic meters.

Merchantable fund of forestries consists of mature and over-mature stands, which can be assigned for harvesting. Area of exploitable merchantable forest is 409.1 thousand hectares. 75.1 thousand hectares of mature exploitable forests are registered in total. The share of stands dominated by conifers and hardwoods accounts for 53.5% of merchantable fund, the remaining part of merchantable fund is represented by softwood stands. Reserve of mature and over-mature stands, suitable for exploitation, is 16.7 million cubic meters, of which 2.8 million cubic meters is represented by conifers and 715 thousand cubic meters are for hardwood stands.

Bryansk forests stand out from the forests of other regions by their compactness, high productivity, significant percentage of conifers, an extensive road network, both general use and forest ones.
DEMOGRAPHICS AND LABOR POTENTIAL OF BRYANSK REGION

DEMOGRAPHICS AND LABOR POTENTIAL OF BRYANSK REGION

POPULATION OF THE REGION

As of 01.01.2011, the resident population of Bryansk Region was 1275.3 thousand people, including male - 58.1 thousand people, or 45.6%, female - 69.4 thousand people, or 54.4%. Female population in Bryansk Region exceeds male population by 1.2 times.

As of 01.01.2012 the resident population of Bryansk Region totaled 1264.4 thousand people.

Bryansk Region is classified as one of the Russian Federation regions with unfavorable demographic situation. Over the period 2007-2011 the reduction of the resident population amounted to 53.2 thousand people.

Negative impact on the demographic situation in the region as a whole is caused by natural population decline, when the death rate exceeds the birth rate.

Population living in urban areas reduced from 2007 to 2011 by 25.5 thousand people, and by 27.7 thousand people for rural areas.

The economically active population of Bryansk Region is 991.3 thousand people or 78.4% of the population. Almost half of the economically active population, or 47% resides in the six urban districts of Bryansk Region. 35% of the economically active population of the region is concentrated in Bryansk.

The registered unemployment rate in the period 2007-2011 was in the range 1.3-2.6%. With that, the ceiling of 2.6% was recorded in the crisis year of 2009. Subsequently unemployment declined, and in 2011 the registered unemployment rate was 1.5%.

POPULATION OF THE REGION

As of 01.01.2011, the resident population of Bryansk Region was 1275.3 thousand people, including male - 58.1 thousand people, or 45.6%, female - 69.4 thousand people, or 54.4%. Female population in Bryansk Region exceeds male population by 1.2 times.

As of 01.01.2012 the resident population of Bryansk Region totaled 1264.4 thousand people.

Bryansk Region is classified as one of the Russian Federation regions with unfavorable demographic situation. Over the period 2007-2011 the reduction of the resident population amounted to 53.2 thousand people.

Negative impact on the demographic situation in the region as a whole is caused by natural population decline, when the death rate exceeds the birth rate.

Population living in urban areas reduced from 2007 to 2011 by 25.5 thousand people, and by 27.7 thousand people for rural areas.

The economically active population of Bryansk Region is 991.3 thousand people or 78.4% of the population. Almost half of the economically active population, or 47% resides in the six urban districts of Bryansk Region. 35% of the economically active population of the region is concentrated in Bryansk.

The registered unemployment rate in the period 2007-2011 was in the range 1.3-2.6%. With that, the ceiling of 2.6% was recorded in the crisis year of 2009. Subsequently unemployment declined, and in 2011 the registered unemployment rate was 1.5%.

POPULATION OF THE REGION

As of 01.01.2011, the resident population of Bryansk Region was 1275.3 thousand people, including male - 58.1 thousand people, or 45.6%, female - 69.4 thousand people, or 54.4%. Female population in Bryansk Region exceeds male population by 1.2 times.

As of 01.01.2012 the resident population of Bryansk Region totaled 1264.4 thousand people.

Bryansk Region is classified as one of the Russian Federation regions with unfavorable demographic situation. Over the period 2007-2011 the reduction of the resident population amounted to 53.2 thousand people.

In the context of recessionary development of natural reproduction processes the role of migration flows in the formation of the regional population remains negative. Over the period 2004-2010 more than 50.6 thousand people arrived to the region, and more than 55 thousand people left. Regional migration loss for the period was 5 thousand people. In 2011, migration loss increased by 1.7% to 2010 and amounted to 4.3 thousand people. The proximity of the Moscow metropolitan area has played and will play a negative role in future migration flows. International migration from CIS and Baltic States remains to be compensating factor in the external migration of the region.

Migration monitoring, supervision and provision of public services in the region is performed by the Department of the Federal Migration Service of the Russian Federation for Bryansk Region, located at: 26 Pioneerskaya st, Bryansk, 241050, office phone: (4832) 71-85-00.

Labor migration regulation in the region is provided by bilateral and multilateral intergovernmental agreements, Federal laws of the Russian Federation, RF Government Decrees and other laws and regulations:

- Agreement of 24 January 2006 between the Russian Federation and the Republic of Belarus on equal rights of citizens of the Russian Federation and the Republic of Belarus on freedom of movement and choice of residence on the territory of member states of the Union State;
- Federal law No. 114 of 15.08.1996 "On the Procedure for Exit from the Russian Federation and Entry into the Russian Federation" (as last amended on 28.12.2010 by No. 417-FZ);
- Federal law No. 109 of 18.07.2006 "On Migration Registration of Foreign Citizens and Stateless Persons in the Russian Federation" (as last amended on 23.12.2010 by No. 385-FZ);
- Resolution No. 183 of the Government of the Russian Federation of March 18, 2008 "On Approval of Rules for Submission by the Employer or Customer of Works (services) of the Notice on Recruitment and Engagement in Labor Activity of Foreign Nationals and (or) Stateless Persons Arriving in the Russian Federation in Accordance with Visa-Free Procedure, and Having Work Permit";
- Resolution No. 487 of the Government of the Russian Federation of June 30, 2010 "On Approval of the Form of Request of the Employer or Customer of Works (Services) to Attract Highly Qualified Foreign Specialist and Form of Patent Granted to a Foreign National Arriving in the Russian Federation in Accordance with Visa-Free Procedure,“

Bryansk Region is an industrial-agrarian region with a large share of manufacturing sector and the potential for innovative development.

**GROSS REGIONAL PRODUCT DYNAMICS & STRUCTURE**

Before the crisis, the economic development of Bryansk Region was characterized by steady growth. The gross regional product for 2005-2008 has nearly doubled to up to 125.8 billion rubles at the end of 2008.

In 2009, Bryansk Region, among other regions of the country experienced negative impact of the global financial crisis. Decline in gross regional product was 8.8%.

In 2010 – 2011, economic development dynamics of Bryansk Region were characterized by recovery processes. Gross regional product amounted to $144.3 billion rubles in 2010, an increase of 4.5% to 2009.

Gross regional product in 2011 is estimated at 177.6 billion rubles, or 107% in comparable prices to 2010 level.

By GRP structure Bryansk Region is an industrial-agrarian region. At the present economic development stage the industrial production accounts for nearly one-fifth of GRP. The share of agriculture and forestry is 10.8%.

**INDUSTRIAL SECTOR**

The basis of Bryansk Region industrial potential is formed by more than 300 large and mid-sized enterprises, and about 700 small enterprises.

In 2011, industrial production continued to grow and reached 110.9% as compared to 2010, which is significantly higher than the overall rate in the Russian Federation - 104.7% and in the Central Federal District -105.9%.

Sales of own-produced goods, works and own services for industrial economic activities were 100.8 billion rubles, the growth rate in real prices amounted to 121.7% as compared to 2010.

Throughout the year, high rate of production (113.1%) have been reported in the manufacturing sector.

Growth leaders are enterprises manufacturing transport vehicles and equipment, where production index was 143.1%.

High growth rates were recorded in the manufacture of rubber and plastic products, wood processing and manufacturing of wood products.
Industrial production structure

- Food, beverages and tobacco production
- Transport vehicles and equipment
- Gas and water production and distribution
- Machinery and equipment production
- Finished metal products manufacturing
- Pulp & paper industry, publishing, printing industry
- Manufacturing of electrical, electronic and optical equipment
- Rubber and plastic products manufacturing
- Woodworking and wood products manufacturing
- Metallurgical production and finished metal products manufacturing
- Other sectors
- Textile and garment industry

GRP structure by type of activities, 2010

- Wholesale and retail trade, personal services: 20.1%
- Processing enterprises: 16.7%
- Transport and communications: 14.4%
- Agriculture, hunting and forestry: 10.8%
- Public administration: 8.6%
- Construction: 6.5%
- Real estate operations: 6.1%
- Healthcare & social services: 4.9%
- Energy generation and distribution: 4.6%
- Education: 4.4%
- Other: 3.0%
textile and garment industry, leather production, leather products and footwear.

Manufacturing activities have the largest share in the industrial production structure - 86.1%, followed by power generation and distribution - 13.6%, and mining - 0.4%.

The major shares in the manufacturing sector belong to food processing, manufacturing of transport vehicles & equipment, machinery and equipment.

The industrial complex is characterized by a high degree of spatial concentration of production facilities. The industrial potential is largely concentrated in the northeastern part of the region (Bryansky, Dyatkovsky district). The industrial potential of the western part of the region is concentrated in two cities with a diversified industrial complex: Klintsy and Novozybkov.

Competitive products of Bryansk Region industry: marine diesel engines, mainline and shunting locomotives, cars and platforms of various modifications, repair of locomotives and diesel engines, spare parts for railway transport, rolled products.

LLC PC Bezhitsk Steel Works
1 Stalelitneyaya st., Bryansk 241038

ECONOMIC POTENTIAL OF BRYANSK REGION

Investment Passport of Bryansk Region

Areas of specialization are livestock, crop growing and seed farming.

Agro-industrial complex of Bryansk Region is rapidly growing. For 2011, the gross agricultural output in current prices amounted to 32.5 billion rubles, the volume index to the level of 2010 was 128.2%, including crop production -15.7 billion rubles (150.8%), livestock -16.8 billion rubles (109.1%).

In 2011, agricultural enterprises manufactured 46.3% of total agricultural output, and the farmers, including individual entrepreneurs, accounted for 11.7%.

### Agricultural Industry

Bryansk Region agricultural complex (AGC) is a set of interrelated agricultural sectors, forming the framework for organizational and production cohesion of processes that provide means of production, as well as ensure actual manufacturing of agricultural products and raw materials and their processing into final consumption products. Processing and food industry form the basis of food security in the region.

There are about 2000 enterprises and private (peasant) farms in the agricultural sector. The main areas of specialization are livestock, crop growing and seed farming.

The share of arable lands in the total arable area in 2011 grew by 4.7% as compared to the previous year and amounted to 66.4%.

**Agricultural production volume**

![Graph showing agricultural production volume](chart.png)

The crop growing industry focuses on facilities for the storage and processing of products for the purpose of bringing it closer to consumers. High-tech potato storage depots and granaries are built in the region.

In the livestock industry, total production of livestock and poultry for slaughter in live weight for all categories of farms in 2011 was 146 thousand tons. Meat production increase as compared to the last year was 13%.

The State program for agricultural development and regulation of agricultural products, raw materials and food for 2008-2012 is being implemented in the agricultural complex of Bryansk Region.

As a result of program activities, the amount of agricultural output in current prices in 2011 amounted to 32.5 billion rubles, or 128.2%, in comparable prices to 2010.
Expenditures of the consolidated budget of Bryansk Region on agriculture per 1 ruble of agricultural output in 2011 amounted to 0.024 rubles (in 2010 v 0.018 rubles). In the 2012 - 2014 period a gradual reduction of this indicator is planned.

Amount of loans raised by agricultural industry is growing annually. In 2011 the volume of loans granted to agricultural companies of Bryansk Region amounted to 6.4 billion rubles, in 2010 the figure was 4.67 billion rubles.

Bryansk Region AGC needs construction, reconstruction and modernization of livestock breeding complexes (farms), livestock and feed production facilities; storage facilities for potatoes, vegetables and fruit; greenhouses for the production of fruits and vegetables in protected ground, flax and flax-fibre processing facilities; meat packing houses, livestock and milk primary processing facilities, including processing and storage of meat and dairy products.

CONSTRUCTION INDUSTRY

The volume of work performed under Construction category in Bryansk Region in 2011 grew (in constant prices) by 0.2% to 2010 and amounted to 16,886.2 million rubles.

Large and medium sized businesses and organizations performed Construction category works for the amount of 5650.0 million rubles (82.5%) to 2010.

Investment in capital construction projects for large and mid-sized enterprises in 2010 amounted to 16.50 billion rubles, an increase to 2009 level - 40.6%.

Amount of housing commissioned exceeded by 7.8% the 2010 level and totaled 421.4 thousand square meters; one third was built by people at their own expense, and using raised loans. Bryansk Region ranks fifth in terms of housing construction rates among the regions of the Central Federal District.
in terms of deploying enterprises producing consumer goods, retail and entertainment centers.  

In 2011, retail sales totaled 135.8 billion rubles, which is above the 2010 level by 12.6%. 2011 is characterized by outrunning sales growth of non-food products (22.9%), retail food trade was less dynamic and increased by only 3.4%.  

In 2011, 86% of retail trade sales were formed by trading organizations and individual entrepreneurs operating out of the market. Almost a fifth of retail sales of the region was formed by retail chains, the share of small business accounts for 53% of the goods sold to the population.  

### CONSUMER MARKET  

The modern consumer market of the region is stable, highly saturated with goods, with extensive network of trade companies, public catering and consumer services, and high entrepreneurial activity.  

Capacity of the consumer market determines the investment attractiveness of Bryansk Region.
Public catering turnover amounted to 7.2 billion rubles in 2011, an increase compared to 2010 was 13.1%. The volume of paid personal services increased in 2011 by 2.6% to 34.5 billion rubles.

Consumer market is driven by personal income growth. In general, according to preliminary estimates population income amounted to 231.2 billion rubles in 2011, growing by 13% to 2010; real disposable income increased by 6.8%.

### Finance & budget

The essential tool for implementation of the regional investment policy is the budget of Bryansk Region.

Consolidated budget revenues of Bryansk Region grew by 73% over 2007-2011 period. In 2011, total budget revenues amounted to 385,526.1 million rubles, an increase of 17.6% compared to 2010.

Tax revenues of the budget consist mainly of personal income tax and corporate income tax.

Capital expenditures of the consolidated budget are growing, which evidences the dynamic development of Bryansk Region. The largest share of capital expenditures is spent on construction, renovation and repair of social infrastructure facilities, construction and repair of roads, rural development, resettlement of lower-income people out from old and dilapidated housing.

### Foreign economic activity

Bryansk Region is actively developing foreign economic relations and increasing the volume of foreign trade. Trading partners include companies from over 70 countries from CIS and other parts of the world.

The major portion of foreign trade accounted for CIS countries (68.5%). Foreign trade turnover with CIS in 2011 was 2.2 times higher than the turnover with other foreign countries and reached $1,085.6 million USD (an increase of 8.9% compared with 2010). Exports reached $257.2 million USD (down by 0.2%), import - $828.4 million USD (increase of 12.1%).

In 2011, foreign trade turnover of the region amounted to 1,585.3 million, which is 11.4% above the 2010, including export- 324.2 million.
dollars (up 2.9%), import – 1261.1 million dollars (up 13.8%).

The largest share (36.8%) in total exports belonged to mechanical engineering products.

The leading commodity groups in regional import were "Food and agricultural raw materials", "Machinery, equipment and transport vehicles", "Metals and metal products".

Small business

In 2011, 8594 small businesses carried out economic activity in Bryansk Region which is an increase of 17.2% to 2010. The average number of employees in all small enterprises was 85,700 people, which is 10.3% higher than in 2010. Turnover of small businesses across all activities increased in 2011 by 24.5% to 117.4 billion rubles.

In order to provide favorable environment for small and medium business the following regulations were adopted in Bryansk Region:
- Bryansk Region Law No. 80v3 of October 5, 2009 "On the development of small and medium enterprises in Bryansk Region";
- Bryansk Region Law No. 103v3 "On establishment in 2012 of differentiated tax rates on the tax levied in connection with the simplified tax system for certain categories of taxpayers who have chosen revenues, reduced by expenditures as their tax base";
- Bryansk Region Law No. 49v3 of July 3, 2010 "On the use of simplified tax system by individual entrepreneurs based on the patent in Bryansk Region";
- Resolution No. 120 of the Regional Administration of February 13, 2009 "On approval of the administrative regulation on the provision of public service" Advice and institutional support to small and medium-sized enterprises ";
- Resolution No. 287 of the Regional Administration of March 31, 2009 "On financial support to small and medium enterprises";
- Resolution No. 795 of the Regional Administration of June 31, 2009 "On approval of the list of state property of Bryansk Region to be used only for the purpose of assigning for possession, and (or) use on a long-term basis (including on reduced rental rates) to small and medium-sized businesses and organizations that form small and medium enterprises support infrastructure."

According to the Orders of the Department of Economic Development of Bryansk Region, the departmental target program "State support for small and medium enterprises in Bryansk Region" (2010-2012) was adopted.

Reasonably extensive infrastructure to support small and medium enterprises was created in the region.

GAU Bryansk Regional business incubator has been operating since 2008. The goal of the business incubator is to help entrepreneurs at the early stage of operations.

In December 2009, Bryansk Warranty Fund was launched. The Fund is a nonprofit organization established to improve the potential of small business in the regional economy. The main activity of the Fund is to provide guarantees for liabilities (credit, loans, leasing contracts, etc.) of small and medium enterprises of Bryansk Region to creditors. In addition, the Fund has such structural units as the Center for Coordination of Support of Export-Oriented Small and Mid-sized Businesses and the Euro Info Correspondence Centre of Bryansk Region.

There are two microcredit funds in the region, providing micro-loans to small and medium enterprises in the amount of up to one million rubles, up to one year at 9% per annum.
BRYANSK AREA SCIENTIFIC & INNOVATION POTENTIAL
RESEARCH INSTITUTIONS

Research and technical potential of Bryansk Region includes a complex of large R&D and design institutes, scientific & industrial enterprises and associations.

HIGHER EDUCATION AND PROFESSIONAL EDUCATION INSTITUTIONS

Specialists for various sectors of economic and social sector are trained at:

- 25 higher educational institutions running higher education programs, including 4 state universities (Academician Petrovsky Bryansk State University, Bryansk State Technical University, Bryansk State Engineering and Technology Academy, Bryansk State Agricultural Academy), 13 branches of state universities and 7 branches of private universities located in Bryansk;
- 29 secondary education institutions;
- 29 basic vocational schools.

Higher education system of the region trains managerial and engineering staff. In 2011, the number of graduates of state higher education institutions amounted to 8648 people (93.6% to 2010). The number of postgraduate students at the end of 2011 was 649 people. 147 postgraduate students successfully completed their studies (105% to 2010).

The number of graduates in public schools of secondary vocational education was 4858 people (94.1% to 2010).

INNOVATION ACTIVITIES

Bryansk Region ranks 7th in the CFD in terms of innovation activities of organizations. R&D activities of Bryansk Region scientists increasingly result in patents for inventions and utility models. In 2011, 111 intellectual property objects were protected with patents.

In order to ensure the investment attractiveness of innovations and enhance the interest of enterprises and organizations of the region in promoting innovation, annual review competitions are held to identify the most effective inventions, know-how, new products and technologies, as well as innovative products exhibitions. A registry of innovation activities is formed in the region.

Bryansk Region cooperates with JSC RUSNANO on financing of nanotechnology projects. Presently enterprises and organizations of Bryansk Region are preparing applications, and some have already applied to JSC RUSNANO for funding their projects.

- CJSC Kremny El Group – financing the project “Production of microsurgery scalpels with silicon single crystal blades.”
- LLC Basalt-Management - financing the project “Production of nano-modified continuous basalt fiber with annual capacity of 10000 tons”.
- LLC Ekokremny - financing the project “Expansion and diversification of high-tech production of nanosilicon”.

With the support of RUSNANO, the project of JSC METAKLEY for the production of nanosilicates and polymer nanocomposites with their use was implemented in Bryansk Region.

State support is provided to small innovative businesses by creating conditions for their development. In 2011, the state support was provided to 34 operating small and mid-sized innovative companies for the total amount of 50 million rubles.

Beginner innovative companies are supported in the form of grants of up to 500 thousand rubles for development. In 2011, the subsidy was provided to 21 companies of the region for a total of 10 million rubles.

The list of major research and design institutions of Bryansk Region

OJSC Scientific-Research Institute Isoterm
1 Shchorsa blvd., Bryansk, 241031
Tel. (4832) 30-35-49, fax (4832) 30-35-47
E-mail: root@ni-izoterm.debryansk.ru
www.ni-izoterm.ru

Products: equipment for growing monocrystal materials, equipment for storage (recycling) facilities for solid and liquid radioactive waste, special physical and thermal equipment for microelectronics, electrothermal equipment and medical equipment.

CJSC Integrated Circuit Design and Technology Scientific and Technical Center
103 Krasnoarmeyskaya st., PO Box 2, Bryansk, 241037.
Tel. (4832) 41-48-85, fax (4832) 41-42-49
E-mail: root@sitsemi.ru

Products: discrete silicon devices, integrated circuits, power electronics, MEMS and silicon-based parent materials.
JSC Design, Technology and Research Center Spetsmash  
17 Moscovsky passage, Bryansk, 241020  
Tel. (4832) 73-72-86, fax (4832) 73-72-82  
E-mail: specmash@online.debryansk.ru  
**Area of activity:** experimental design, scientific research and experimental work, development of design, technological and repair documentation for products for general industrial use and military equipment, supervision during manufacturing and operation of products, software.

OJSC Bryansk Special Design Bureau  
136 Vokzalnaya st., Bryansk, 241017  
Tel. (4832) 53-04-03, fax (4832) 53-16-86  
E-mail: mail@bskb.ru  
**Products:** control & monitoring systems, audio and video systems for rail transport.

GNU All-Russian Lupine Research Institute of the Russian Agricultural Academy  
2 Berezovoya st., Michurinsky village, Bryansk Region, 241524  
Tel. (4832) 91-15-40, fax (4832) 91-10-10  
E-mail: lupin@online.bryansk.ru  
**Area of activity:** creation of new narrow-leaved breeds of white and yellow lupine, efficient use of natural resources and the reproduction of soil fertility on the basis of lupine bio resources, technologies for processing and preservation of lupine products, development of new varieties of fruits and berries.

GU Novozybkov Agricultural Experiment Station VNIIA  
Experimental Station village, Novozybkovsky district, Bryansk Region, 243020  
Tel. (48343) 3-32-20  
E-mail: ngost@mail.ru  
**Area of activity:** optimizing nutrient regime of sandy soils, rehabilitation technology for grassland contaminated with radionuclides, improving crop growing technologies.

FGU State Nature Reserve Bryansk Forest  
Nerussa village, Suzemsky district, Bryansk Region, 242180  
Tel. (48353) 2-57-75, fax (48353) 2-57-73  
E-mail: zapole@online.debryansk.ru  
**Area of activity:** study of the natural course of processes occurring in nature, identifying relationships in the natural complex, monitoring of rare species of plants and animals, creating geo-botanical reserve map.

Higher vocational education institution of Bryansk Region  
State Higher Education Institution Academician I.G. Petrovsky Bryansk State University (BGU)

TRANSPORT INFRASTRUCTURE

The Bryansk Region transport system is represented by rail, road and air transport. Transport complex formed in the region plays an important role in the international (Ukraine, Belarus, and Western Europe), inter-regional and intra-regional freight and passenger connections.

The major part of the region is located in areas of convenient transport accessibility, near railways and roads, which is predetermined by a sufficiently high density of formed transport routes.

The total length of railways in Bryansk Region is 979 km. There are three major railway junctions: Bryansk-1 - passenger station, Bryansk-2 - sorting station, Unecha - section station. Density of common-use railways is 289 km per 10 thousand sq. km, which exceeds the nationwide level.

The whole region is crossed in the north-south direction by the railway Moscow - Bryansk - Suzemka - Kiev, used for main connections with Ukraine. This is a double-track line with locomotive traction.

In the east-west direction the Orel - Bryansk - Smolensk line is operated, providing connection of the Baltic States and Belarus with the central regions and Volga region of Russia via single-track line running on diesel traction.

Bryansk - Zlynka line supports basic national economic connections between Russia and Belarus. The line is single-track with diesel traction.

The region includes several more single-track railway lines of local importance, such as Bryansk- Sukhinichi, Bryansk - Dyatkovo and Bryansk-Komarichy, serving to connect major district centers with the regional center.

The total length of motor roads in the region is 18203 km, including 590 km of federal significance, 5698 km of regional significance, 11939 km of local significance.

Federal highway M-3 "Ukraine" is one of the main components of the regional road network, starting in Moscow and running through Obninsk, Kaluga, Bryansk up to the border with Ukraine (and then to Kiev). Length of the road within the region is 192 km. The road has asphalt surface, width of carriageway is 7 m. The road belongs to second technical category.

Federal highway A-141 (P120), Orel - Bryansk - Smolensk-Republic of Belarus is 178 km long and belongs to 2nd category.

Federal highway M-13, Bryansk - Novozybkov is 220 km long and belongs to 2nd category.

In addition to major regional roads the region has an extensive road network, providing direct links with numerous settlements.

Densitity of surfaced roads is quite high - an average of 278 km/1000 sq. km, including those for public use 187 km/1000 sq. km.

Air transport of the region is represented by airport complex, commissioned in 1994. International Airport Bryansk is located in the international air route R-22, connecting Moscow with Kiev and Western Europe. The airport has international status, has a concrete runway with length of 2400 m, accommodating aircraft of IL-76, Tu-154, Yak-42, Boing-737, A-310 types and others.

Bryansk Region is crossed by major oil and gas pipelines, including oil pipelines "Druzhba", BTS-2. Pipelines Dashava - Moscow and Shebelinka - Moscow laid through the region allow extensive use of low-cost and environmentally friendly fuel - natural gas - for the development of the regional energy sector.

ENERGY SECTOR

98.7% of energy consumed in Bryansk Region is imported and transported from other regions.

Two economic sectors dominate in the region in terms of consumption of fuel and energy resources (FER): industry, which accounts for 46% of energy resources, and housing and communal services, accounting for 39%.

Other sectors of the regional economy that can be named include transport and agriculture (4% of fuel resources each), healthcare, education and culture (about 4% of fuel resources in total).

The main active power generating sources of the region are Bryanskaya SDPP and Klintsovskaya CHP. Production of electricity and heat is managed by Bryansk Regional Generation, a branch of JSC Territorial Generating Company-4.

The predominant part of the electricity comes from outside the region via 750 kV lines Smolenskaya NPP - Novobryanskaya and Kurskaya NPP - Novobryanskaya. Bryansk power grid is connected with power grids of Center UES: Smolenskaya (one 750 kV HV line, one 110 kV HV line), Kaluzhskaya (one 220 kV HV line, three 110 kV HV lines), Kurskaya (one 750 kV HV line, one 220 kV HV line), Lipetskaya (one 500 kV HV line), Orel (three 110 kV HV lines), as well as with the power grid of the Republic of Belarus (four 110 kV HV lines).

Heating of industrial and household consumers in towns and workers settlements
of the region is performed by two power plants of the system: Bryansk SDPP and Klintsovskaya CHP with total steam boiler capacity of 750 t/h, water boilers - 100 Gcal/h; from two CHPs of industrial plants with total steam boiler capacity of 500 t/h and water boiler capacity of 400 Gcal/h; from 424 boiler plants of OJSC Bryansk Utility Systems, LLC Bryanskteploenergo with installed capacity of 2254.76 Gcal/h, from 1627 departmental boiler plants with capacity of 3601 Gcal/h.

Among 5 entities of the wholesale energy market of Bryansk Region, the only major utility supplier is OJSC Bryanskenergosbyt - one of the largest regional power grid companies, meeting about 72% of regional energy needs.

Communications

Bryansk Region ICT & telecommunications market is highly concentrated. The leader in dial-up access is OJSC Rostelecom, represented by its Bryansk branch, holding 90% of fixed communications. The branch provides local, intra-regional, telegraph communication services, data transmission and cable broadcasting services.

Limited Liability Company Mobile TelecomService has 10000 numbers of total installed capacity.

The largest share in the volume of communication services is maintained by mobile communications, with share exceeding 50%. Mobile services in Bryansk Region are rendered by
- Bryansk branch of OJSC Mobile TeleSystems (MTS)
- Bryansk branch of OJSC VimpelCom (Beeline)
- Bryansk branch of CJSC Mobicom-Center (Megafon)
- Bryansk branch of CJSC Smolensk Cellular Communications (TeLe2)

TV broadcast coverage in the whole region is 97%. In the cities and towns of the region residents are able to received federal, state and local TV & radio broadcasts, as well as cable TV.

Market infrastructure

Another contributing factor for increasing economic growth rates and implementation of large-scale investment programs is the powerful banking system of Bryansk Region. The banking sector is represented by 19 branches, as well as internal divisions of nonresident commercial banks. 86 branches and offices of insurance companies from other regions are operating in the region, as well as organizations that provide consulting services in economics, auditing, and management area; Bryansk Chamber of Commerce operates in the region as well.

Small and medium businesses are supported by GAU Bryansk Guarantee Fund in terms of providing credit and other financial resources to small and medium enterprises through guarantees on liabilities to creditors.

INVESTMENT POLICY

BRYANSK REGION INVESTMENT LAWS

The main trends of the regional investment policy are focused on implementation of a set of systematic measures providing for qualitative improvement of the investment climate in the region, ensuring the creation of conditions for substantial investment inflows.

Investment activities on the territory of Bryansk Region are governed by the following policy and regulatory framework:

• Bryansk Region Law No. 29v3 of August 19, 1996 "On investment activities, tax incentives and guarantees to investors in Bryansk Region" (as amended on December 29, 2011 by No. 142-3 (granting the tax credit);
• Bryansk Region Law No. 79v3 of November 27, 2003 "On corporate property tax" (as amended by on May 12, 2011 by No. 40-3);
• Bryansk Region Law No. 73-3 of November 26, 2004 "On the reduction of corporate income tax rate for individual categories of taxpayers" (as amended on May 12, 2011 by No. 39-3);
• Bryansk Region Law No. 161-3 of December 10, 2007 "On mortgage fund of Bryansk region";
• Bryansk Region Law No. 77-3 of August 5, 2011 "On participation of Bryansk Region in public-private partnership";
• Bryansk Region Law No. 90-3 of October 5, 2011 "Determining the agency authorized to make decision to change the timing of payment of taxes in the form of investment tax credit";
• Resolution No. 792 of the Regional Administration of October 9, 2007 "On the Investment Council under the Administration of the Region";
• Resolution No. 604 of Bryansk Regional Administration of June 20, 2008 "On approval of the socio-economic development strategy of Bryansk Region to 2025";
• Resolution No. 278 of Bryansk Regional Administration of March 26, 2009 "On mortgage fund of Bryansk Region";
• Resolution No. 167 of Bryansk Regional Administration of February 25, 2010 "On the competitive selection of investment (innovation) projects for the right to use objects of mortgage fund of Bryansk Region";
• Resolution No. 1023 of Bryansk Region on October 11, 2010 "On the establishment of state autonomous organization "Agency for the support of investment projects";
• Resolution No. 1322 of Bryansk Regional Administration of 20 December 2010 "On approval of procedure for the support of investment projects planned for implementation, and (or) implemented in Bryansk Region";

A significant positive contribution to the support of investment activities is made by the system of state support of investment activity of investors, implemented on the basis of the Bryansk Region Law No. 29v3 of August 19, 1996 "On investment activities, tax incentives and guarantees to investors in Bryansk Region."

The main forms of state support of investment activities are the provision of tax incentives for corporate property tax and corporate income tax and partial subsidization of interest rates on bank loans taken by investors for projects implementation.

In 2011, companies implementing investment projects received tax benefits for corporate property tax and income tax in the amount of 197.7 million rubles.

The regional administration provides assistance in the development and obtaining initial permits for the project, in solving issues related to registration, organization and filing documents with tax authorities, reservation and allocation of land and production sites, registration of title, conclusion of lease contracts, resolving disputes and conflicts that may arise during project implementation, obtaining legal, auditing, and insurance support for the project, as well as in procuring appraisal services.
BRYANSK REGION INVESTMENT RATING

Independent rating research made by Expert RA agency shows that the region has a positive growth of investment attractiveness, it has investment grade rating ZV1 and the area is classified as a region with a moderate risk.

DYNAMICS AND STRUCTURE OF INVESTMENTS

In 2010, Bryansk Region showed some of the highest growth rates (2nd place) in the Central Federal District in terms of investment volume. Most of the investments were aimed at transport sector.

In 2011, the investment activity of enterprises remained at the level of the previous year. Investment in fixed capital from all sources in 2011 reached 48.0 billion rubles, or 101.0% as compared to 2010 (in comparable prices).

The main source of investment activities were raised funds (over 66%). The share of central budget funds amounted to 23.4% of the total investment volume.

The main flow of investments was directed to the development of agriculture - 28%, transport and communications - 24%, to manufacturing facilities- 15%, provision of community and social services - 13%.

The volume of foreign investments in Bryansk Region in 2011 was $44.6 million USD, up 75% over the previous year. Incoming foreign capital included direct investment for the amount of $10.1 million USD (22.8%), and other investment of $34.4 million USD (77.2%)

PROJECTS SUCCESSFULLY IMPLEMENTED

Each year investment projects are implemented in the region, aimed at launching and modernization of enterprises and manufacturing facilities. The important social effect of their implementation is the creation of new jobs. More than 13 thousand jobs are to be created to 2028 through implementation of 77 investment projects.

APH Miratorg is implementing in Bryansk Region an EU-class investment project for the production of highly productive beef cattle with the purpose to develop domestic production of meat and provide quality beef for Russian consumers.

Slavneft company is implementing an investment project for the construction of an oil refinery in the region with capacity of 300 thousand tons of oil a month.
The list of major projects

Organization of competitive high-tech domestic production of modified layered nanosilicates, masterbatches (nanocomposite precursors) and new generation polymer nanocomposite materials
Project originator: CJSC Metakley Karachev town
Project goal: organization of a competitive domestic production of high-tech modified layered nanosilicates, masterbatches and polymer nanocomposite materials of new generation
Project cost — 1415000.0 thousand rubles

Construction of a pig-breeding complex for 7590 sows and breeding farm for 1800 sows in Vygonichsky district of Bryansk Region
Project originator: LLC Tsar Myaso, Bryansk
Project goal: creation of a modern high-tech competitive pig breeding facility
Project cost — 5075000.0 thousand rubles

Broiler poultry development
Project originator: LLC Kurinoye Tsarstvov Bryansk, Bryansk
Project goal: construction of a new production site, modern hatchery, reconstruction of poultry slaughter and processing plant, acquisition of technological transport.
Project cost — 2442000.0 thousand rubles
Implementation period - 2009-2013.

Creation of a complex producing high-yield beef cattle and cattle slaughter and primary processing complex
Project originator: LLC Bryansk Meat Company Trubcevsky district
Project goal: organization of production facility of to 48 thousand tons of beef in beef cattle live weight per year, creating breeding herd of 100 thousand units, creation of industrial and infrastructure facilities
Project cost — 20628000.0 thousand rubles
Implementation period - 2010-2028.

A pig farm Zhiryatinsky district of Bryansk Region for 50320 units per year
Project originator: LLC Meat Corporation, Zhiryatinsky district
Project goal: construction of pig-breeding complex for 50320 units per year
Project cost — 729992.0 thousand rubles.

Setting up and launching commercial production of military cranes, crawler cranes, tower cranes and jib cranes with a capacity of 40 tons and more
Project originator: OJSC Klintsy Truck Crane Plant, Klintsy town
Project goal: diversifying production, expanding existing operations, increasing truck crane equipment market share, moving with significant share to new markets to sale crawler and tower cranes
Project cost - 687000.0 thousand rubles

Expansion of production in CJSC Klintovsky silicate plant - developing the production of cellular concrete blocks (gas silicate)
Project originator: CJSC Klintsy silicate plant, Klintsy town
Project goal: creating the production site manufacturing cellular concrete (gas silicate) with capacity 180000 cubic meters p.a. through purchase of production line equipment and reconstruction of pressing-autoclave plant
Project cost – 278000.0 thousand rubles
Implementation period - 2008-2013.

Re-equipment of the foundry No. 3 in LLC PK Bezhitsk Steel Works
Project originator: LLC Industrial Company Bezhitsk Steel Plant, Bryansk
Project goal: creating a stable manufacturing environment, ensuring constantly reproducible high quality products, complying with all applicable and future regulatory requirements
Project cost – 4824000.0 thousand rubles
Implementation period - 2010-2020.

Plant for the production of frozen cooked potatoes and potato flakes (Dobrun village, Bryansk Region)
Project originator: LLC EkoFrio Bryansky district
Project goal: construction of plant for the production of frozen potato fries, potato flakes, potato starch
Project cost – 4137400.0 thousand rubles

Construction of a pig-breeding complex for 7590 sows and breeding farm for 1800 sows in Vygonichsky district of Bryansk Region
Project originator: LLC Tsar Myaso, Bryansk
Project goal: creation of a modern high-tech competitive pig breeding facility
Project cost – 5075000.0 thousand rubles
Construction of plant for the production of ceramic building materials in Klintsy town

**Project originator:** CJSC Metrobeton, St. Petersburg  
**Project goal:** construction of a plant for the production of ceramic building materials with capacity of 80 million conventional bricks per year  
**Project cost** – 2200000.0 thousand rubles  

Construction of new particle board and laminated particle board plant

**Project originator:** OJSC Dyatkovo-DOZ, 225 Lenina st., Dyatkovo town, Bryansk Region, 242603.  
**Project goal:** construction of a new plant for the production of laminated particle board with capacity of 400 cubic meters per day with the use of imported energy-efficient process equipment  
**Project cost** – 1037500.0 thousand rubles
